

Members Telecom

International Data Service

Members International Data Services are delivered via the World's leading business grade networks with coverage in 220 countries. Our solutions range from single site internet access to multi-site private networks, integrating a wide range of access technologies. At Members Telecom we'll work with you to identify your business-wide data needs as we appreciate each solution requires tailoring to suit the specific needs of each of your national & international business locations.

- Australia-wide and International coverage
- Secure, flexible, business class Internet & WAN services
- No need to deal with multiple foreign providers
- Eliminate FOREX risks & operational complexity

Members Telecom can provide you with a tailored company-wide solution for all your network and Internet needs. Fully managed services including supply, installation and ongoing equipment maintenance. With Members Telecom your business is connected to Premium Business Grade services, and we manage all the complexity. Through our established relationships your service will be proactively managed on a 24x7 basis, by our local support team.

Members International Data is a high quality business grade service with global coverage that delivers a full range of broadband, VPN and fixed network products and speeds including:

- 1Mb to 100Mb access speeds
- Internet VPN or Private backbone
- Unlimited data allowances
- Cisco routers included
- End-to-end managed service
- Fixed AUD pm rates for international services
- Consolidated billing for national and international services
- Members Data Services are backed with a business grade service level agreement

Have your data services billed via a bundled single monthly invoice, which is able to incorporate the complete and extensive range of products and services delivered by Members Telecom for national & international services.
